

Пример View Instantiation в Controller

```
class ExampleController: UIViewController {
    private var exampleView = ExampleView()
    ...
    override func loadView() {
        super.loadView()
        setupExampleView()
    }
    private func setupExampleView() {
        let presenter = ExamplePresenter(exampleView: ExampleView)
        exampleView.presenter = presenter
        exampleView.setupView()
        self.view = exampleView
    }
}
```
