Nota Bene

Presenter отвечают за всю сложную логику

Используем @escaping для передачи данных из нашего сервиса в ViewController

```swift
10  final class SlidePresenter {
15      private var currentIndex = 0 {
16          didSet {
17              if currentIndex < 0 {
18                  currentIndex = 0
19              }
20              if currentIndex > slidesTotal {
21                  currentIndex = slidesTotal
22              }
23          }
24      }

33      private func getSlide() {
34          slideService.fetchSlide(index: currentIndex) { slide, total in
35              self.slidesTotal = total
36              self.presentationView?.loadSlide(slide: slide)
37
38              if self.currentIndex == 0 {
39                  self.presentationView?.setupInitialButtons()
40              } else if self.currentIndex == total - 1 {
41                  self.presentationView?.setupFinalButtons()
42              } else {
43                  self.presentationView?.setupDefaultButtons()
44              }
45          }
46      }
```
